KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>You should consider and satisfy yourself as to the risks of investing in the sub-fund. An investment in the sub-fund is meant to produce returns over the long term. You should not expect to obtain short-term gains from such investments. The risk factors may cause you to lose some or all of your investments. A description of the major risks is provided below.</p>	<p>For further information, please refer to “Risks” on page 3 of the Fund Summary for ILP.</p>
Market and Credit Risks	
<p>You are exposed to the following risks:</p> <p>Market Risks</p> <p>The value of investments by the sub-fund may go up and down due to changing economic, political or market conditions, or due to an issuer’s individual situation.</p> <p>Interest Rate Risks</p> <p>The sub-fund’s investment in debt securities may be subject to the risk of interest rate fluctuations which may cause the price of debt securities to go up or down. In general, as nominal interest rates rise, the value of fixed income securities is likely to fall.</p> <p>Currency Risks</p> <p>Foreign currency exchange rate movements are likely to influence the returns to investors in Singapore, hence investors may be exposed to exchange rate risk. While the underlying fund attempts to hedge the currency risk passively, there can be no guarantee that it will be successful in doing so.</p> <p>Credit Risks</p> <p>The value of the sub-fund will be negatively affected if the issuer or guarantor of a fixed income instrument, or counterparty to a derivative contract, is unable or unwilling to meet its financial obligations.</p> <p>Sovereign Debt Risks</p> <p>The sub-fund may invest in bonds issued or guaranteed by governments or authorities, which may involve political, economic, default or other risks.</p> <p>Emerging Markets Risks</p> <p>Emerging markets will generally be subject to greater political, legal, counterparty and operational risks.</p> <p>Foreign Investment Restriction Risks</p> <p>Some countries prohibit or restrict the repatriation of income, capital or the proceeds from the sale of securities. The sub-fund may incur higher costs investing in these countries. Such restrictions may delay the investment or repatriation of capital of the sub-fund.</p>	
Liquidity Risks	
<p>You are exposed to liquidity risks.</p> <p>There is no secondary market for the sub-fund. All redemption requests should be made to the Manager or its appointed agents. Redemption of the underlying fund may be suspended in certain circumstances detailed in the underlying fund’s Luxembourg prospectus under Appendix B – Summary of Certain Provisions of the Articles and of Company Practice (www.blackrock.com/sg/en/literature/prospectus/bgf-singapore-prospectus-sg.pdf).</p>	

Product-Specific Risks

You are exposed to the following risks:

Derivatives Risks

The use of derivatives may expose the sub-fund to a higher degree of risk. Derivative contracts can be highly volatile and a relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities. Leveraged derivative position can hence increase the sub-fund's volatility. The sub-fund may sustain loss as a result of the failure of a derivatives counterparty to comply with the term of the derivative contract. The sub-fund may also use derivatives to facilitate more complex efficient portfolio management techniques.

Distressed Securities Risks

The sub-fund may invest in securities issued by a company that is in financial difficulty or in default. There is no guarantee that any exchange offer or reorganisation will be successfully completed.

Non-investment Grade Risks

Non-investment grade securities will generally pay higher yields than more highly rated securities but will be subject to greater market credit and default risks.

Risks of Securities Lending

The sub-fund may engage in securities lending. As such, the sub-fund will have a credit risk exposure to the counterparties to any securities lending contract. The sub-fund's investment can be lent to counterparties over a period of time. A default by the counterparty combined with a fall in the value of the collateral below that of the value of the securities lent may result in a reduction in the value of the sub-fund. Please refer to the section on "Use of Derivatives and Securities Lending" of the underlying fund's prospectus for more details (www.blackrock.com/sg/en/literature/prospectus/bgf-singapore-prospectus-sg.pdf).

Risks Relating to Distributions

The Manager of the sub-fund has the absolute discretion to determine whether a distribution is to be made. The Manager also reserves the right to review and make changes to the distribution policy from time to time. Where the income generated by the sub-fund is insufficient to pay distributions as declared, the Manager may at its discretion make such distributions out of the capital of the sub-fund. In circumstances where distributions are paid out of the capital of the sub-fund, the NAV of the sub-fund will be reduced.
