Investment Strategy

<p>The sub-fund helps investors gain exposure to a broad range of asset classes by investing primarily in collective investment schemes (CIS) and/or exchange traded funds (ETFs), which in turn invest in quoted equities and equity-related securities, bonds and other fixed income securities in global markets. The sub-fund may also seek exposure to other asset classes, including but not limited to property and commodities-related securities indirectly through CIS, ETFs and/or similar instruments.</p> <p>The sub-fund employs a combination of Strategic Asset Allocation (SAA) and Tactical Asset Allocation strategies in its investment approach. This allows the Sub-Investment Manager to not only set the long-term focus for the sub-fund, but also respond to short-term market drivers. The sub-fund will allocate approximately 50% in bonds and 50% in equities across four major asset classes – Global Bonds, Asian Bonds, Global Equities and Asian Equities according to the SAA.</p>	<p>For further information, please refer to “Investment Scope and Investment Approach” of the Fund Summary for ILP.</p>
