### **Investment Strategy**

The sub-fund seeks to provide yield enhancement to SGD deposit rate by investing in a diversified portfolio of good quality money market instruments and short-term bonds.

In managing the sub-fund, the Manager seeks to employ investment strategies for interest rate, credit and yield curve positioning through a combination of top-down and bottom-up analysis. The subfund may employ derivative instruments for hedging and efficient portfolio management purposes.

For further information, please refer to "Investment Scope and Investment Approach" of the **Fund Summary** for ILP.

The securities and instruments in which the sub-fund may invest are subject to market fluctuations and other risks inherent in such investments and there can be no assurance that any appreciation in value will occur.	TOT ILL.			
The risk factors may cause you to lose some or all of your investments. A description of the major risks is provided below.				
Market and Credit Risks				
You are exposed to the following risks:				
Market Risks Prices of the securities held by the sub-fund may go up or down, sometimes rapidly or unpredictably. Securities may decline in value due to factors affecting securities markets generally or particular industries.				
Interest Rate Risks The sub-fund's investment in debt securities may be subject to the risk of interest rate fluctuations which may cause the price of debt securities to go up or down. In general, as nominal interest rates rise, the value of fixed income securities is likely to fall.				
Credit Risks Changes in the financial condition or credit standing of an issuer may negatively affect the sub-fund. An issuer of fixed income securities may suffer adverse changes in its financial condition and unable to pay the principal and/or interest on the instrument.				
Liquidity Risks				
You are exposed to liquidity risks.  There is no secondary market for the sub-fund. All redemption requests should be made to the Manager.				
Product-Specific Risks				
You are exposed to the following risks:				
Derivatives Risks				
The sub-fund may invest in derivatives instruments including futures, options, forwards, swaps or				
credit derivatives for purposes of hedging and/or efficient portfolio management. Derivatives involve				
risks different from, and, in some cases, greater than, the risks presented by more traditional securities				
investments. The usage of derivatives may negatively impact the value of the sub-fund.				

The global exposure of the sub-fund to financial derivatives or embedded financial derivatives will be calculated using the commitment approach and in accordance with provisions of the Code on Collective Investment Schemes. The Manager will ensure that the risk management and compliance procedures are adequate and have been or will be implemented and that it has the necessary expertise to manage the risks relating to the use of financial derivatives.

Management	reviewed from time to time. However, it shall not exceed 2.0% of the sub-fund
Fee	balance at any point of time.

### VALUATIONS AND EXITING FROM THIS INVESTMENT

#### HOW OFTEN ARE VALUATIONS AVAILABLE?

The sub-fund is valued daily on an offer/bid basis. All transactions for ILP are based on forward pricing. The prices are updated on the website of Income on each business day.

# HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

You can exit the sub-fund at any time by informing the insurer, either directly or through the financial adviser from whom you purchased the sub-fund.

If you do so within the cancellation period of 14 days from time of purchase, you may do so without incurring the sales charge and fees stated above. However, you will have to take the risk for any price changes in the NAV of the sub-fund since you purchased it.

You will receive the sale proceeds within 7 business days from the time the insurer receives your request to exit from the sub-fund.

Your exit price is determined as follows:

1. If you submit the redemption order before 3 pm on a business day, you will be paid a bid price based on the net asset value of the sub-fund at the close of that business day.

For further information, please refer to "Subscription of Units" and "Redemption of Units" in section 5 and 6 of the Product Summary for ILP.

2. If you submit the redemption order after 3 pm, you will be paid a price bid based on the net asset value at the close of the next business day.

The sale proceeds that you will receive will be the exit price multiplied by the number of units sold, less any charges as stated in the terms of the ILP, if applicable.

An example, assuming that redemption charge is not applicable, is as follows:

Exit price	X	Number of units sold	=	Gross Sale Proceeds
S\$1.250	X	1,000	=	S\$1,250

Gross Sale Proceeds	-	Redemption Charge	=	Net Sale Proceeds
S\$1,250	-	S\$0.00	=	S\$1,250

Depending on the ILP that you are investing in, a redemption charge may be applicable. Please refer to the Product Summary of the ILP for more details.
