#### KEY FEATURES OF THE SUB-FUND

<p><b>WHAT ARE YOU INVESTING IN?</b></p> <p>The investment objective of the sub-fund is to seek current income and long-term capital appreciation.</p> <p>The sub-fund aims to achieve the objective by investing all or substantially all of its assets in the PIMCO GIS Income Fund SGD (Hedged) Inc Share Class (“underlying fund”).</p> <p>The sub-fund is denominated in Singapore Dollars.</p> <p>The sub-fund currently offers a monthly distribution feature. Distributions are not guaranteed and can be made out of the income, capital gains and/capital of the sub-fund. Distributions paid out of capital will result in erosion of capital and may affect the potential for future capital growth. This cycle may continue until all capital is depleted. If distributions are made, such distributions are not a forecast, indication or projection of the future performance of the sub-fund. The making of any distribution will not imply that further distributions will be made. Distributions are expected to result in an immediate reduction of the net asset value per share/unit.</p>	<p>For further information, please refer to “Investment Objective, Investment Scope and Fund Details” of the Fund Summary for ILP.</p>

<b>KEY RISKS</b>	
<p><b>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</b>            You should consider and satisfy yourself as to the risks of investing in the sub-fund.</p> <p>An investment in the sub-fund is meant to produce returns over the long-term. You should not expect to obtain short-term gains from such investments. The securities and instruments in which the sub-fund may invest are subject to market fluctuations and other risks inherent in such investments and there can be no assurance that any appreciation in value will occur.</p> <p>The risk factors may cause you to lose some or all your investments. A description of the major risks is provided below.</p>	<p>For further information, please refer to “Risks” of the Fund Summary for ILP.</p>
<b>Market and Credit Risks</b>	
<p><b>You are exposed to the following risks:</b></p> <p><b>Credit Risk</b>            The sub-fund is subject to credit risk as it could lose money if the issuer or guarantor of a Fixed Income Security in which it invests, or counterparty to a derivatives contract, is unable or unwilling to meet its financial obligations.</p> <p><b>Currency and Interest Rate Risks</b>            The value of the sub-fund is subject to currency fluctuations due to changes in exchange rates between currencies or the conversion from one currency to another that may cause the value of the sub-fund’s investments to diminish or increase. The value of Fixed Income Securities held by the sub-fund is likely to decrease if nominal interest rates rise.</p>	
<b>Liquidity Risks</b>	
<p><b>Liquidity Risks</b>            The sub-fund is exposed to liquidity risk where it invests in derivative instruments which are difficult to purchase or sell. If a derivative transaction is particularly large or if the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.</p> <p>There is no secondary market for the sub-fund. All redemption requests should be made to the Manager. In exceptional circumstances, the sub-fund's investments in underlying funds may not be readily redeemable.</p>	
<b>Product-Specific Risks</b>	
<p><b>Global Investment Risks</b>            The sub-fund is subject to global investment risk as securities of certain international jurisdictions may experience more rapid and extreme changes in value.</p> <p><b>High Yield Risks</b>            The sub-fund may be subject to greater levels of interest rate, credit and liquidity risks than Funds that do not invest in such securities.</p> <p><b>Emerging Markets Risks</b>            The sub-fund is subject to emerging markets risk as it invests in securities of issuers based in developing economies which may present market, credit, currency, liquidity, legal, political, geopolitical and other risks different from, and potentially greater than, the risks of investing in developed foreign countries.</p> <p>The sub-fund may be subject to risks from directly investing in Fixed Income Instruments traded on CIBM. It may be exposed to liquidity risks, settlement risks, default of counterparties and market volatility associated with CIBM.</p>	

<p><b>Derivatives Risks</b></p> <p>The sub-fund may invest in derivatives for hedging and Efficient Portfolio Management purposes that are subject derivative risks including liquidity risk, interest rate risk, market risk, credit risk and management risk. The value of derivatives can be volatile because a small movement in the value of the underlying asset can cause a large movement in the value of the derivative, resulting in losses in excess of the amount invested by the underlying fund. Derivatives will typically be used as a substitute for taking a position in the underlying asset.</p> <p>All or part of the sub-fund Management Fees may be charged to the capital of the sub-fund, and on redemption investors may not receive back the full amount invested.</p>
