KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? You should consider and satisfy yourself as to the risks of investing in the sub-fund. An investment in the sub-fund is meant to produce returns over the long-term. You should not expect to obtain short-term gains from such investments. There is no assurance that the investment objectives of the ILP sub-fund will actually be achieved. The securities and instruments in which the sub-fund may invest are subject to market fluctuations and other risks inherent in such investments and there can be no assurance that any appreciation in value will occur. The risk factors may cause you to lose some or all your investments. A description of the major risks is provided below.	For further information, please refer to “Risks” of the Fund Summary for ILP.
Market and Credit Risks	
Market Risk Your investments may be subject to significant price movements due to the impact of economic, political, market, and issuer-specific factors in India. Emerging Market Risk Investments in emerging markets such as India involve certain risks such as currency fluctuations and economic and political uncertainties. These markets are generally smaller in size and have less liquidity than developed markets. Currency Risk The underlying fund is exposed to the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations. Risks of Investing in Warrants Warrants are more volatile than the securities to which the warrants are linked, exposing the underlying fund to greater risk.	
Liquidity Risks	
The sub-fund is not listed on Singapore Exchange and you can redeem only on Business Day through Income Insurance. There is no secondary market for the sub-fund. Your realisation request may be deferred or suspended. Redemptions of shares may be deferred when more than 10% of the value of the underlying fund’s shares are redeemed or exchanged on any one Luxembourg Business Day. Your right to realise shares may also be temporarily suspended under certain circumstances as described in the underlying fund prospectus. Liquidity Risk of the Underlying Fund’s Investments Under exceptional market conditions the manager may be forced to sell assets of the underlying fund at a discount in order to meet continued redemption requests.	

Product-Specific Risks											
Single Market Risk The underlying fund invests primarily in a single market, and as a result is subject to higher concentration risk and potentially greater volatility compared to funds following a more diversified policy. Risks Associated with Small and Mid-Sized Companies The underlying fund will invest in small to mid-sized companies, which tend to have less liquidity and be more sensitive to changes in economic conditions and interest rates than larger, more recognised companies. As a result, the stock prices of small to mid-sized companies tend to fluctuate up and down more than those of larger companies. The underlying fund will be subject to risks associated with its investment into other collective investment schemes.

VALUATIONS AND EXITING FROM THIS INVESTMENT
HOW OFTEN ARE VALUATIONS AVAILABLE?

The sub-fund is valued on every Business Day to determine the Unit price. All transactions for ILP are based on forward pricing. The prices of sub-funds are available on the Income Insurance's website at www.income.com.sg.

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

You can exit the sub-fund at any time by informing the insurer, either directly or through the financial adviser from whom you purchased the sub-fund.

If you do so within the cancellation period of 14 days from time of purchase, you may do so without incurring the sales charge and fees stated above. However, you will have to take the risk for any price changes in the NAV of the sub-fund since you purchased it.

You will receive the sale proceeds within 7 Business Days from the time the insurer receives your request to exit from the sub-fund.

Your exit price is determined as follows:

1. If you submit the redemption order before 3 pm on a Business Day, you will be paid a bid price based on the net asset value of the sub-fund at the close of that Business Day.
2. If you submit the redemption order after 3 pm on a Business Day, you will be paid a price bid based on the net asset value at the close of the next Business Day.

The sale proceeds that you will receive will be the exit price multiplied by the number of Units sold, less any charges as stated in the terms of the ILP, if applicable.

An example, assuming that redemption charge is not applicable, is as follows:

Exit price	X	Number of Units sold	=	Gross Sale Proceeds
S\$1.250	X	1,000	=	S\$1,250

Gross Sale Proceeds	-	Redemption Charge	=	Net Sale Proceeds
S\$1,250	-	S\$0.00	=	S\$1,250

Depending on the ILP that you are investing in, a redemption charge may be applicable. Please refer to the Product Summary of the ILP for more details.

For further information, please refer to "Subscription of Units" and "Redemption of Units" sections of the Product Summary for ILP.
