

## Investment Objective

The investment objective is to seek current income and long-term capital appreciation.

## Investment Scope

The sub-fund intends to achieve the objective by investing all or substantially all of its assets in the PIMCO GIS Income Fund SGD (Hedged) Inc Share Class (“underlying fund”).

The underlying fund will utilise a global multi-sector strategy that seeks to combine the Investment Advisor’s total return investment process and philosophy with income maximization. Portfolio construction is founded on the principle of diversification across a broad range of global fixed income securities.

The underlying fund uses top-down and bottom-up strategies to identify multiple sources of value to generate consistent returns. Top-down strategies are deployed taking into account a macro view of the forces likely to influence the global economy and financial markets over the medium term. Bottom-up strategies drive the security selection process and facilitate the identification and analysis of undervalued securities.

The sub-fund is denominated in Singapore Dollars.
