

Takaful Fund

Fund Summary
as of 1 September 2022

Investment Objective

To achieve long-term capital appreciation by investing in a diversified global portfolio of equity securities issued by companies considered to be in compliance with Islamic guidelines. This sub-fund is designed based on Islamic principles.

Investment Scope

The sub-fund invests in the global equity markets via instruments that are Shariah compliant. The sub-fund is denominated in Singapore Dollars.

Investment Approach

The sub-fund seeks to achieve long-term, total returns in excess of the S&P Global BMI Shariah Index through bottom-up security selection. The portfolio invests in equity securities of companies worldwide, which comply with Shariah guidelines developed by the index provider's Shariah supervisory board.

The investment approach provides broadest exposure to the Global Industry Analysts' highest conviction ideas across sectors, regions and market cap, adding value through fundamental, bottom-up security analysis within their areas of industry expertise. Sector allocations are typically maintained close to index weights and country allocation is a fallout of stock selection.

The overall investment approach is diversified by investment style as individual analysts have developed valuation methodologies that have proven most relevant to their particular industries. As a result, the portfolio combines a blend of investment disciplines, which diversifies investment style risks.

Risks

Key Risks

Income's ILP sub-funds are intended for long-term investment, it is not suited for any short-term speculation. You should not expect to obtain any short-term gains from investing in Income's ILP sub-funds. It is important that your investment suit your risk appetite. You may wish to consult your financial adviser before investing in any ILP sub-fund.

The securities and instruments in which the sub-fund may invest are subject to market fluctuations and other risks inherent in such investments and there can be no assurance that any appreciation in value will occur.

You should be aware that past performance is not indicative of future performance. The value of the units may rise or fall as the performance of the sub-fund changes.

The risk factors may cause you to lose some or all of your investments. A description of the major risks is provided below. This is not an exhaustive list of risks.

Market and Credit Risks

You are exposed to market risks. Prices of the securities held by the sub-fund may go up or down, sometimes rapidly or unpredictably. Securities may decline in value due to factors affecting securities markets generally or particular industries.

You are exposed to currency risks. Changes in exchange rates between currencies or the conversion from one currency to another may cause the value of a sub-fund's investments to diminish or increase. Currency exchange rates may fluctuate significantly over short periods of time.

You have greater exposure to market risks as this is an equity fund. Historically, equities have greater volatility than bonds and other fixed income securities. The sub-fund's valuation and the price at which you can exit may correspondingly fluctuate more strongly on a day-to-day basis compared to sub-funds investing in bonds and other fixed income securities.

Liquidity Risks

You are exposed to liquidity risks. There is no secondary market for the sub-fund. All redemption requests should be made to the Manager.

Product-Specific Risks

You are exposed to derivatives risks. The sub-fund may invest in derivatives instruments including futures, options, forwards, swaps or credit derivatives for purposes of hedging and/or efficient portfolio management. Derivatives involve risks different from, and, in some cases, greater than, the risks presented by more traditional securities investments. The usage of derivatives may negatively impact the value of the sub-fund.

The global exposure of the sub-fund to financial derivatives or embedded financial derivatives will be calculated using the commitment approach and in accordance with provisions of the Code on Collective Investment Schemes. The Manager will ensure that the risk management and compliance procedures are adequate and have been or will be implemented and that it has the necessary expertise to manage the risks relating to the use of financial derivatives.

You are exposed to risks arising from Shariah investment guidelines. The sub-fund may perform less well than other funds with comparable investment objectives that do not seek to adhere to Islamic investment criteria. This may include disadvantageous divestments at the instruction of the Shariah adviser. It is intended that the Shariah investment guidelines will be observed at all times, but no assurance can be given as there may be occasions when the sub-fund investments do not fully comply with such criteria for factors outside the control of the Manager.
