You should not expect to obtain short-term gains from such investments. The securities and instruments in which the sub-fund may invest are subject to market fluctuations and other risks inherent in such investments and there can be no assurance that any appreciation in value will occur.</p> <p>The risk factors may cause you to lose some or all of your investments. A description of the major risks is provided below.</p>	For further information, please refer to "Risks" of the Fund Summary for ILP.
Market and Credit Risks	
<p>General Market Risk</p> <p>The underlying fund is exposed to various general trends and tendencies in the economic and political situation as well as securities markets and investment sentiment, which may lead to substantial and longer-lasting drops in prices affecting the entire market.</p> <p>Country and Region Risk</p> <p>The underlying fund's investments focus on US and/or Canada may increase the concentration risk. The underlying fund is susceptible to the adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event or development in and risks of this region, or of companies based and / or operating in this region.</p> <p>Currency Risk</p> <p>The underlying fund may hold assets or have a share class denominated in foreign currencies. If these foreign currency positions have not been hedged or if there is any change in the relevant exchange control regulations, the net asset value of the underlying fund may be affected unfavourably.</p> <p>Issuer Default Risk</p> <p>The issuer of securities held by the underlying fund may become insolvent causing its inability to fulfill his payment obligations in a full and timely manner and causing such issued assets to become economically worthless.</p>	

Creditworthiness Risk The creditworthiness (ability to pay) of the issuer of an asset held by the underlying fund may fall. This usually leads to a decrease in the price of the asset greater than that caused by general market fluctuations. Emerging Market Risk The underlying fund invests in emerging markets which are subject to greater liquidity risk, currency risk, general market risk, settlement risk and custodial risk. The underlying fund is additionally subject to legal, taxation and regulatory risks.		
Liquidity Risks		
Liquidity Risk The sub-fund is not listed on Singapore Exchange and you can redeem only on Business Day through Income Insurance. There is no secondary market for the sub-fund.		
Product-Specific Risks		
Company Specific Risk The value of the underlying fund's assets may drop significantly and for an extended period of time if company specific factors deteriorate. Derivatives Risk (i) the derivatives may be misvalued or may have varying valuations; (ii) the use of derivatives may not completely hedge the risk intended to be hedged; (iii) derivatives may become difficult to sell. In such cases, the underlying fund may not be able to liquidate a position at an appropriate time or price; (iv) there is also a creditworthiness risk; (v) given the leverage effect embedded in derivatives, even a small investment in derivatives could have a substantial, even negative, effect on the performance of the underlying fund. Risk of Interest Rate Changes If market interest rates rise, the value of the interest-bearing assets held by the underlying fund may decline substantially. This applies to an even greater degree if the underlying fund also holds interest-bearing securities with a longer time to maturity and a lower nominal interest rate. Risk of Investing in High-Yield Investments and Convertible Bonds. These risks include increased creditworthiness risk, risk of interest rate changes, general market risk, company-specific risk, risk of default, prepayment risk and liquidity risk. Downgrading Risk The credit rating of interest-bearing securities held by the underlying fund may be downgraded. The underlying fund may or may not be able to dispose of the securities that are being downgraded. This may lead to a fall in the net asset value of the underlying fund. Valuation Risk The valuation of the underlying fund assets may involve uncertainties and judgmental determinations which may affect the net asset value calculation of the underlying fund. Credit Rating Risk Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times. Asset Allocation Risk There is no assurance that the strategy employed by the underlying fund will be successful and therefore the investment objective of the underlying fund may not be achieved. The investments of the underlying fund may be periodically rebalanced and therefore may incur greater transaction costs.

HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COSTS IN DOING SO?

You can exit the sub-fund at any time by informing the insurer, either directly or through the financial adviser from whom you purchased the sub-fund.

If you do so within the cancellation period of 14 days from time of purchase, you may do so without incurring the sales charge and fees stated above. However, you will have to take the risk for any price changes in the NAV of the sub-fund since you purchased it.

You will receive the sale proceeds within 7 Business Days from the time the insurer receives your request to exit from the sub-fund.

Your exit price is determined as follows:

Exit price	X	Number of Units sold	=	Gross Sale Proceeds
S\$1.250	X	1,000	=	S\$1,250
Gross Sale Proceeds	-	Redemption Charge	=	Net Sale Proceeds
S\$1,250	-	S\$0.00	=	S\$1,250
