INVESTMENT-LINKED PLAN

FOOD FOR THOUGHT

In the face of life's unexpected turns and ever-changing market conditions, do you possess **the adaptability to navigate challenges and attain your investment goals?**

Time is the greatest tool we have for building wealth. Starting to invest early allows you to take advantage of the power of compounding and can help you achieve your long-term goal at a lower cost. Based on an illustration by J.P. Morgan Asset Management, one who started investing early ends up with nearly double the amount of another individual who started only 10 years later¹.

A survey revealed close to half (45%) of Singaporeans² say they do not have enough funds to meet family needs for the next year. **How can you boost your savings to meet your needs for you and your family?**

Seek opportunities to grow wealth by kick-starting your investment journey from as low as \$200 a month. In today's unpredictable times, you can cultivate growth with Invest Flex as you choose your minimum investment period (MIP). This regular premium³ investment-linked plan offers you the flexibility you need while investing so you can achieve your investment goals, even when life throws you a curveball.
