

AIM 2025 Fund

Fund Summary
as of 22 September 2020

Investment Objective

To generate capital growth at a sensible risk level for investors who intend to accumulate assets for retirement or other purposes until the year 2025.

Investment Scope

The sub-fund intends to achieve this objective by investing in a diversified portfolio of asset classes including fixed income, equities and alternatives. The sub-fund is denominated in Singapore Dollars.

Investment Approach

Target maturity multi-asset portfolio that invests in a broad range of asset classes to deliver consistent returns over a market cycle. A volatility target combined with an asset allocation range is defined for each AIM Portfolio whereby the total risk for each portfolio is aligned with the remaining years left to maturity. Asset allocation decisions are largely driven from a top-down basis considering broader macro environment and outlook for assets over the next leg of the economic cycle. The allocation between the asset classes will become more conservative as the portfolio approaches its maturity date, reflecting the need for reduced investment risks and volatility as retirement approaches. It is intended for the assets to be switched into the AIM Now Fund once the portfolio reaches its maturity date for investors to enjoy a steady income and stable capital value after retirement.

Risks

Key Risks

Income's ILP sub-funds are intended for long-term investment, it is not suited for any short-term speculation. You should not expect to obtain any short-term gains from investing in Income's ILP sub-funds. It is important that your investment suit your risk appetite. You may wish to consult your financial adviser before investing in any ILP sub-fund.

The securities and instruments in which the sub-fund may invest are subject to market fluctuations and other risks inherent in such investments and there can be no assurance that any appreciation in value will occur.

You should be aware that past performance is not indicative of future performance. The value of the units may rise or fall as the performance of the sub-fund changes.

The risk factors may cause you to lose some or all of your investments. A description of the major risks is provided below. This is not an exhaustive list of risks.

Market and Credit Risks

You are exposed to market risks. Prices of the securities held by the sub-fund may go up or down, sometimes rapidly or unpredictably. Securities may decline in value due to factors affecting securities markets generally or particular industries.

You are exposed to interest rate risks. The sub-fund's investment in debt securities may be subject to the risk of interest rate fluctuations which may cause the price of debt securities to go up or down. In general, as nominal interest rates rise, the value of fixed income securities is likely to fall.

You are exposed to currency risks. Foreign currency exchange rate movements are likely to influence the returns to investors in Singapore, hence investors may be exposed to exchange rate risk. While the underlying fund attempts to hedge the currency risk passively, there can be no guarantee that it will be successful in doing so.

You are exposed to credit risks. Changes in the financial condition or credit standing of an issuer may negatively affect the underlying fund. An issuer of fixed income securities may suffer adverse changes in its financial condition and unable to pay the principal and/or interest on the instrument.

Liquidity Risks

You are exposed to liquidity risks. There is no secondary market for the sub-fund. All redemption requests should be made to the Manager.

Product-Specific Risks

You are exposed to derivatives risks. Derivative instruments, including futures, options, warrants, forwards, swaps or swap options, may be used from time to time in managing the investments of the sub-fund. The use of derivatives may expose the sub-fund to a higher degree of risk. Derivative contracts can be highly volatile and a relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities. Leveraged derivative position can hence increase the sub-fund's volatility. The sub-fund may sustain loss as a result of the failure of a derivatives counterparty to comply with the term of the derivative contract. The sub-fund may also use derivatives to facilitate more complex efficient portfolio management techniques.

AIM 2025 Fund

Soft Dollar Commission or Arrangement

The Manager and Sub-Investment Manager did not retain for its own account, cash or commission rebates arising out of transactions executed in or outside Singapore. The Manager and Sub-Investment Manager also did not receive soft dollars for the sub-fund.

Conflicts of Interest

As the Manager of various ILP sub-funds and insurance funds, we may from time to time have to deal with competing or conflicting interests between these sub-funds/insurance funds. However, we will use all reasonable endeavours to act fairly and in the best interest of the sub-fund. We will conduct all transactions with or for the sub-fund on an arm's length basis. The Manager has in place policies and procedures to monitor and mitigate conflicts of interest which may arise in the management of these sub-funds. We believe that these policies and procedures are reasonably designed to ensure that portfolio management decisions are made in the best interest of the sub-fund and each sub-fund is treated fairly, regardless of the existence of any conflict.

Schroder has in place policies and procedures to mitigate conflicts of interest which may arise in the management of clients' accounts. Schroder believes that these policies and procedures are reasonably designed to ensure that clients are treated fairly and material conflicts of interest are either avoided or are managed to avoid damage to a client's interests.

Other Parties

The auditor of this sub-fund is KPMG LLP. Please note that financial results ending 31 December of each year will be audited.

Material Information
