Section A: Policyholder's or assignee's Risk Profile

It is important to recommend suitable products that reflect your risk preferences. People make investment decisions based on time, performance of an investment and the risk they are prepared to accept. You should consider that short-term capital losses might be a consequence of aiming for higher, longer-term returns. As a general rule, the higher the potential return, the higher the risk that capital may not be returned.

This risk profile questionnaire helps to assess your risk tolerance level. Please answer each question accordingly.
