KEY FEATURES OF THE SUB-FUND

WHAT ARE YOU INVESTING IN?

The sub-fund seeks to provide long-term capital growth and income by investing primarily in a portfolio of income generating securities with positive E/S characteristics globally and through the use of derivatives. Securities with positive E/S characteristics from issuers are those that the Investment Manager believes show effective governance and superior management of environmental and social issues (sustainable characteristics). The sub-fund aims to achieve the objective by investing all or substantially all of its assets in the JPMorgan Investment Funds - Global Income ESG Fund A (mth) - SGD (hedged) (“underlying fund”).

For a sub-fund that feeds 100% into an underlying Collective Investment Scheme (“CIS”) fund, some of the information provided below could be similar to the underlying CIS fund.

The sub-fund is denominated in Singapore Dollars.

The sub-fund currently offers a monthly distribution pay-out feature. Distributions are not guaranteed and can be made out of the income, capital gains and/capital of the sub-fund.

For further information, please refer to “Investment Objective, Investment Scope and Fund Details” of the Fund Summary for ILP.

The underlying fund commits to investing at least 25% of assets in Sustainable Investments.</p> <p>The underlying fund is an “ESG Fund” in accordance with MAS ESG Circular and is also an UCITS scheme classified as falling under Article 8 of the EU’s Sustainable Finance Disclosure Regulation.</p>	<p>For further information, please refer to “Investment Scope and Investment Approach” of the Fund Summary for ILP.</p>

KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>You should consider and satisfy yourself as to the risks of investing in the sub-fund.</p> <p>An investment in the sub-fund is meant to produce returns over the long-term. You should not expect to obtain short-term gains from such investments. The securities and instruments in which the sub-fund may invest are subject to market fluctuations and other risks inherent in such investments and there can be no assurance that any appreciation in value will occur.</p> <p>The risk factors may cause you to lose some or all of your investments. A description of the major risks is provided below.</p>	<p>For further information, please refer to “Risks” of the Fund Summary for ILP.</p>
Market and Credit Risks	
<p>You are exposed to the following risks:</p> <p>Equity Market, Currency and Interest Rate Risks</p> <p>The underlying fund may invest in fixed income and/or equity funds which may be subject to interest rate and equity market fluctuations. The value and income of the underlying fund are also subject to currency fluctuations.</p> <p>Hedging Risk</p> <p>Any measures taken to offset specific risks could work imperfectly. Hedging may be used to mitigate currency, duration, market or credit risk. Hedging involves costs, which reduce investment performance.</p> <p>Credit Risks</p> <p>Changes in the financial condition or credit standing of an issuer may negatively affect the investment funds that the underlying fund is invested into. An issuer of fixed income securities may suffer adverse changes in its financial condition and be unable to pay the principal and/or interest on the instrument. A bond will generally lose value if the issuer’s financial health deteriorates or appears likely to. An issuer could go into default (become unwilling or unable to make payments on their bonds), which often will make the bond illiquid or worthless.</p>	

Emerging Markets Risks The underlying fund may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency, greater financial risks, higher volatility, and lower liquidity than developed markets.		
Liquidity Risks		
Liquidity Risks There is no secondary market for the sub-fund. All redemption requests should be made to the Manager. In exceptional circumstances, the sub-fund's investments in underlying funds may not be readily redeemable.		
Product-Specific Risks		
Derivatives Risks The underlying fund may use derivatives to achieve its investment objective. The underlying fund may also, within its prescribed limits, invest in derivatives for hedging and efficient portfolio management purposes. The value of derivatives can be volatile because a small movement in the value of the underlying asset can cause a large movement in the value of the derivative, resulting in losses in excess of the amount invested by the underlying fund.		
Distribution Risks The underlying fund may make distributions out of its capital (if income is insufficient). This may cause its net asset value to fall, and amount to a partial return of your original investment and reduced future returns. The distribution rate of the sub-fund may differ from the underlying fund’s distribution rate and the Manager may cease the distribution under extreme market condition.		
Sustainable Fund Risks The underlying fund applies binding criteria when selecting securities which includes investing a defined percentage of portfolio positions in securities exhibiting positive E/S characteristics. The underlying fund also excludes certain sectors, companies, issuers, or practices based on specific norms. Systematically including ESG in investment analysis and as binding on investment decisions may adversely affect the underlying fund’s performance compared to similar funds that do not apply such criteria.
